He added that his mount's action progressively became more acute and near the 500 metres he formed the view that his mount had gone amiss and on straightening attempted to ease his mount down. A post-race veterinary examination revealed the gelding to be acutely lame in its near foreleg (grade 4/5). Trainer Mr P. Facoory was advised that should the gelding resume its racing career he would firstly be required to furnish a veterinary clearance prior to the gelding having to perform satisfactorily in an official barrier trial prior to it being permitted to race again.

Havelka—Change of tactics: from its wide draw to be ridden further back; settled back. Began awkwardly, shifted out and hampered *Bear Esteem*, which had been slow to begin. A post-race veterinary examination of the gelding revealed no abnormalities.
